

18 December 1970

MEMORANDUM FOR THE RECORD

SUBJECT: Telephone Line Capability, Headquarters Building

25X1A

1. In conversation with members of the Telephone Branch, OL, it was reported the existing facilities for telephone lines within the Headquarters

2. While there are sufficient facilities available to meet the needs for telephone or teletype service in the immediate future, provision for additional service is a must should any new building be constructed at the Headquarters site. The capability to provide circuitry for additional data links at the present time is very low - both at Headquarters and at the telephone facility in Arlington.

3. Because no lateral space is available in any direction, expansion room for additional telephone frame equipment will have to be made available immediately above or below the present first floor location. Space on the ground floor is preferred.

Commo Officer
Building Planning Staff, OL
